

VelocityX Sentinel Speed Runners

Product Care & Maintenance Guide

Thank you for choosing VelocityX Sentinel Speed Runners, engineered for elite performance and durability. VelocityX shoes have a strict 30-day return policy. This guide provides essential care instructions to preserve the integrity, comfort, and longevity of your footwear.

Cleaning Instructions

Do not machine wash VelocityX running shoes. To clean, gently remove surface dirt using a soft brush or damp cloth. For deeper cleaning, use mild soap with cold water and lightly scrub affected areas. Avoid harsh chemicals or abrasive materials that may damage the fabric and structure.

Daily Maintenance

After each use, remove dirt and debris from the outsole and upper. Allow shoes to air out naturally to prevent odor buildup. Rotate between pairs if used frequently to maintain optimal cushioning and performance.

Drying

If shoes become wet, remove insoles and laces and let them dry at room temperature. Stuff the interior with paper towels to absorb moisture. Avoid direct heat sources such as radiators, dryers, or sunlight, as excessive heat may warp materials.

Long-term Storage

Store your VelocityX shoes in a cool, dry place away from direct sunlight. Keep them in their original box or a breathable storage bag to maintain shape and protect from dust. Avoid stacking heavy items on top of the shoes to prevent deformation.
